

## New building for Endress+Hauser Italy

Green architecture and modern training facilities designed to enthuse customers

**To offer even better customer service, Endress+Hauser Italy has invested 14 million euros in a trend-setting office building. The move underscores the significance of the Italian market for the global measurement and automation engineering specialist.**

“The modern architecture reflects our quest for transparency, quality, sustainability and customer proximity,” explained Ivano Mazzoletti, Managing Director of Endress+Hauser Italy, at the official opening of the new building. The ceremony was attended by guests of honor from government and industry as well as Endress+Hauser management and employees. Situated on the outskirts of Milan, the three-story building is nestled in a park-like setting and offers 6,000 square meters of floor space.

While approximately 130 employees enjoy a contemporary office environment, customers can expect an excellent infrastructure featuring a showroom, training facilities, auditorium and restaurant. The building also has a two-level underground parking garage. “The new building allows us to address the needs of our domestic and international customers even better than before,” emphasized Ivano Mazzoletti. He plans to expand the range of customer training programs and eventually augment calibration services.

### **Sustainable building concept**

The managing director is proud of the energy-saving building technology that features geothermal probes to support cooling and heating, plus a photovoltaic unit on the roof that generates electricity. Rainwater is collected and used as service water. The massive facade, as well as sophisticated building automation that also controls the sun blinds, lead to further energy savings. “We reduced our energy needs by 60 percent compared to the old headquarters,” said Ivano Mazzoletti. “Three-fourths of the energy is derived from renewable sources.”

Endress+Hauser has maintained a presence in Italy since 1974. Revenue-wise, the country is one of the globally active Group’s largest markets. The sales center has 188 employees, 50 of whom work in the services department. In addition to the headquarters in Cernusco sul Naviglio near Milan, the company operates sales offices in Venice, Turin, Modena, Macerata and Rome. Southern Italy, Sardinia and Sicily are handled through representatives.

Inauguration of the new facilities of Endress+Hauser Italy: Klaus Endress, President of the Supervisory Board of the Endress+Hauser Group, Ivano Mazzoletti, Managing Director of Endress+Hauser Italy, Eugenio Comincini, Mayor of Cernusco sul Naviglio, Matthias Altendorf, CEO of the Endress+Hauser Group and Philippe Praz, Head of Swiss Business Hub Italy (from left) cut the ribbon.

## The Endress+Hauser Group

Endress+Hauser is a global leader in measurement instrumentation, services and solutions for industrial process engineering. The Group employs 13,000 personnel across the globe, generating net sales of more than 2.1 billion euros in 2015.

### Structure

With dedicated sales centers and a strong network of partners, Endress+Hauser guarantees competent worldwide support. Our production centers in 12 countries meet customers' needs and requirements quickly and effectively. The Group is managed and coordinated by a holding company in Reinach, Switzerland. As a successful family-owned business, Endress+Hauser is set for continued independence and self-reliance.

### Products

Endress+Hauser provides sensors, instruments, systems and services for level, flow, pressure and temperature measurement as well as analytics and data acquisition. The company supports customers with automation engineering, logistics and IT services and solutions. Our products set standards in quality and technology.

### Industries

We work closely with the chemical, petrochemical, food & beverage, oil & gas, water & wastewater, power & energy, life science, primaries & metal, renewable energies, pulp & paper and shipbuilding industries. Endress+Hauser supports its customers in optimizing their processes in terms of reliability, safety, economic efficiency and environmental impact.

### History

Founded in 1953 by Georg H Endress and Ludwig Hauser, Endress+Hauser has been solely owned by the Endress family since 1975. The Group has developed from a specialist in level measurement to a provider of complete solutions for industrial measuring technology and automation, with constant expansion into new territories and markets.
